**Cc:** jackwu@sysnix.com.tw  
**Subject:** Orion StarBlast 4.5 EQ Reflector

Joyce,

Price USD88.00 offered by the customer is too low. To keep the customer, if it is possible that Synta only increases by USD2, then the price to the customer is USD90/PC so that we take the project.  
Thanks.

RE StarBlast 4.5 EQ Reflector-

关于这个产品,客户要求的价格 USD88.00 太低,为了服务客人,可否 Synta 只加 USD2,给客人 USD90/PC. 这样我们把这个项目接下来.  
谢谢!

James

James,

Please confirm that if Orion order 1000pcs only, and you accept it for designing 7.5mm eyepiece.

**Subject:** 回復: Fwd: 回復: Fwd: Quote for 1.25 EP kit - StarBlast 4.5 EQ Reflector - Funscope 76mm Reflector Kit

Dear Joyce,

1, 1.25 EP kit-

- a. Our best price is US\$35.80 FOB Ningbo.
- b. For the time being, Sunny doesn't have PL7.5mm available, but PL6.3mm and PL10mm can be provided. Could you please consider taking these instead of PL7.5mm ?

1

NSE00074590

HIGHLY CONFIDENTIAL

TRIAL EXHIBIT 1795.001

If PL7.5mm is a must, we would like to know your yearly demand quantity of such an EP kit for reference so as to make the PL7.5mm to meet your need.

Jason - I would estimate 1,500 pcs per year. We would prefer to keep the 7.5mm as we do not want to have to change our part number. Please let us know if possible. Also what is the MOQ?

Joyce - If the said yearly order is confirmed, factory will go ahead designing the 7.5mm focal length unit, but needs you to send one complete set of sample for reference when order is placed.

Jason - we will agree and when we place the PO we will send you a new unit. What is the MOQ per shipment?

Joyce - A single order for 1500 pcs has to be placed, with partial shipments to finish the order in one year. The MOQ of each shipment : 300 pcs.

Jason - I am afraid I over quoted. And the real yearly volume would be 1,000PCS. Let me know if that volume will work for having to work on the 7.5mm.

我们能设计一个PL7.5mm 目镜,可否请客人寄一套完整的产品给我,以便外观和商标做一样。-

2, StarBlast 4.5 EQ Reflector-

Our best price is US\$117.- FOB Ningbo.

We can design PL7.5MM. Would you please ask the customer to send me a full set of samples so that the appearance can be consistent with the logo.

Jason - our yearly purchase volume for this SKU is around 5,000pcs. Would that volume per year help adjust the price down?

Joyce - What is your target price ?

Jason - Our target price would be \$88 FOB China.

Joyce - Our offer includes 2pcs of 66 deg wide angle eyepiece per your requirement. If you agree to change to other non-wide angle eyepieces, it is possible to offer lower price. Besides, if each shipment may meet MOQ 2000pcs, it will help to reduce cost greatly. Please take this into account .

Jason - We cannot change the eyepieces that are included, it would make for a difficult transition. Also meeting the MOQ of 2,000 per shipment might not work for us in the non-holiday season.

3, Funscope 76mm Reflector Kit -

Our best price is US\$29.- FOB Ningbo.

Sorry, their target price is too low and it includes 66 deg wide angles eyepiece. The factory is not interested in it.

Jason - We would also like to have this telescope CPSIA tested. Do you know what the cost would be to do the testing? Also what is the MOQ?

Joyce - The CPSIA testing cost is US\$2,000.- MOQ: 1000pcs per shipment.

Jason - We will agree to pay for the CPSIA testing. Would it be possible to lower the MOQ to 500pcs Jan-August and then increase it to 1000PCS Sep-December? We will order more than 1000PCS during the holiday months.

Joyce- O.K.

Jason - What do you need from Orion to start the CPSIA testing and when can a sample be made and sent for us to approve.

He may refer to Celestron's FIRSTSCOPE 21024 for products we produced. To make a sample exclusively for him, we need to change lens cone and to make the logo would be also not easy. The sample only can be made after the purchase order has been confirmed. CPSIA testing will be only made after payment of testing costs and finalization of specification and details.

Joyce,

RE StarBlast 4.5 EQ Reflector-

关于这个产品,客户要求的价格 USD88.00 实在太低,为了服务客人,可否 Synta 只加 USD2,给客人 USD90/PC.  
这样我们把这个项目接下来.  
谢谢!

James

**Subject:** 回復: Fwd: 回復: Fwd: Quote for 1.25 EP kit - StarBlast 4.5 EQ Reflector - Funscape 76mm Reflector Kit

Dear Joyce,

1, 1.25 EP kit-

- a. Our best price is US\$35.80 FOB Ningbo.
- b. For the time being, Sunny doesn't have PL7.5mm available, but PL6.3mm and PL10mm can be provided. Could you please consider taking these instead of PL7.5mm ?

If PL7.5mm is a must, we would like to know your yearly demand quantity of such an EP kit for reference so as to make the PL7.5mm to meet your need.

Jason – I would estimate 1,500 pcs per year. We would prefer to keep the 7.5mm as we do not want to have to change our part number. Please let us know if possible. Also what is the MOQ?

Joyce – If the said yearly order is confirmed, factory will go ahead designing the 7.5mm focal length unit, but needs you to send one complete set of sample

for reference when order is placed.

Jason – we will agree and when we place the PO we will send you a new unit. What is the MOQ per shipment?

Joyce - A single order for 1500 pcs has to be placed, with partial shipments to finish the order in one year. The MOQ of each shipment : 300 pcs.

Jason – I am afraid I over quoted. And the real yearly volume would be 1,000PCS. Let me know if that volume will work for having to work on the 7.5mm.

我们能设计一个 PL7.5mm 目镜, 可否请客人寄一套完整的产品给我,以便外观和商标做一样.-

2, StarBlast 4.5 EQ Reflector-

Our best price is US\$117.- FOB Ningbo.

Jason – our yearly purchase volume for this SKU is around 5,000pcs. Would that volume per year help adjust the price down?

Joyce – What is your target price ?

Jason – Our target price would be \$88 FOB China.

Joyce - Our offer includes 2pcs of 66 deg wide angle eyepiece per your requirement. If you agree to change to other non-wide angle eyepieces, it is possible to offer lower price. Besides, if each shipment may meet MOQ 2000pcs, it will help to reduce cost greatly. Please take this into account .

Jason – We cannot change the eyepieces that are included, it would make for a difficult transition. Also meeting the MOQ of 2,000 per shipment might not work for us in the non-holiday season.

3, Funscope 76mm Reflector Kit -

Our best price is US\$29.- FOB Ningbo.

Jason – We would also like to have this telescope CPSIA tested. Do you know what the cost would be to do the testing? Also what is the MOQ?

Joyce - The CPSIA testing cost is US\$2,000.- MOQ: 1000pcs per shipment.

Jason – We will agree to pay for the CPSIA testing. Would it be possible to lower the MOQ to 500pcs Jan-August and then increase it to 1000PCS Sep-December? We will order more than 1000PCS during the holiday months.

Joyce- O.K.

Jason – What do you need from Orion to start the CPSIA testing and when can a sample be made and sent for us to approve.

**Subject:** Fw: Quote for 1.25 EP kit - StarBlast 4.5 EQ Reflector - Funscape 76mm Reflector Kit

Dear Jason,

I hope this message finds you well, and Orion a more prosperous business prospect in 2015.

Please find your pricing requirement as below:

1, 1.25 EP kit-

- a. Our best price is US\$35.80 FOB Ningbo.
- b. For the time being, Sunny doesn't have PL7.5mm available , but PL6.3mm and PL10mm can be provided . Could you please consider taking these instead of PL7.5mm ?

If PL7.5mm is a must, we would like to know your yearly demand quantity of such an EP kit for reference so as to make the PL7.5mm to meet your need.

Jason – I would estimate 1,500 pcs per year. We would prefer to keep the 7.5mm as we do not want to have to change our part number. Please let us know if possible. Also what is the MOQ?

Joyce – If the said yearly order is confirmed , factory will go ahead designing the 7.5mm focal length unit, but needs you to send one complete set of sample

for reference when order is placed.

Jason – we will agree and when we place the PO we will send you a new unit. What is the MOQ per shipment?

2, StarBlast 4.5 EQ Reflector-

Our best price is US\$117.- FOB Ningbo.

Jason – our yearly purchase volume for this SKU is around 5,000pcs.

Would that volume per year help adjust the price down?

Joyce – What is your target price ?

Jason – Our target price would be \$88 FOB China.

3, Funscape 76mm Reflector Kit -

Our best price is US\$29.- FOB Ningbo.

Jason – We would also like to have this telescope CPSIA tested. Do you know what the cost would be to do the testing? Also what is the MOQ?

Joyce - The CPSIA testing cost is US\$2,000.- MOQ: 1000pcs per shipment.

Jason – We will agree to pay for the CPSIA testing. Would it be possible to lower the MOQ to 500pcs Jan-August and then increase it to 1000PCS

Sep-December? We will order more than 1000PCS during the holiday months.

If you have any further question about the aforesaid offer, don't hesitate to let me know.

Regards,

Joyce

Reflector Kit

Hello James,

Hope you are doing well. I hope your 2014 was great and I hope 2015  
will be just as great or even better.

Would you be able to quote me on pricing, MOQ and lead time for 3  
products. I know we had discussed on my last visit and it has been  
difficult to get on top of this from my end.

Images are attached below for your reference.

1. Funscope 76mm Reflector Kit
2. StarBlast 4.5 EQ Reflector
3. TAK 1.25"

Please let me know if you have any questions or concerns.

Best regards,  
Jason Espinosa
